Obar Distributing Co.  
5285 Commerce Parkway West  
Cleveland, Ohio 44130

Dear Mr. Dagata,

I want to personally thank you and your employees, John Joseph and Danny Vicens, for the fine job they did at our Babcock & Wilcox - Mount Vernon, Indiana site during the week of December 7<sup>th</sup>, 2009. These two gentlemen had three of the worst days of weather we have seen in this part of the country in years and yet they never wavered in their effort to remove and install turnstiles at two locations on our plant site. John & Danny fought through torrential downpours one day, tornado like winds the second day, and finger-freezing cold the third day. It was clear that severe weather would not prevent them from moving forward to make sure that we, the customer, received a quality installation.

I cannot express fully how pleased we are with the quality, workmanship, and professionalism with which these turnstiles were installed. It was apparent from the beginning that both John & Danny take pride in their work. Thanks to their knowledge, attention to detail, and craftsmanship we have a gate system that will keep our facility secure for years to come.

You can be assured that should we have any need for gating systems in the future we will be contacting Obar Distributing Co.

Sincerely,

John Hendricks  
Maintenance Analyst  
Babcock & Wilcox
